Reason for Allowance

The following is an examiner's statement of reasons for allowance: the prior art reference of records (US 6,107,871) shows a method for driving the input of an integrator in a delta-sigma converter having an amplifier with a non-inverting input, an output and a positive input connected to a reference voltage and an integration capacitor connected between the non-inverting input and the output, comprising: sampling an input voltage at a first sampling rate onto an input sampling capacitor; dumping charge from the input sampling capacitor to the non-inverting input of the amplifier; sampling a reference voltage onto a feedback sampling capacitor at substantially the first sampling rate; dumping charge stored on the feedback sampling capacitor to the non-inverting input of the amplifier at a second sampling rate. The reference fails to teach or fairly suggest that the second sampling rate different than the first sampling rate. Therefor, claims 1-16 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
